XAVANT STIMPOD **NMS 450X** NERVE STIMULATOR

**Quantitative
TOF
Monitor**
See page 62

Consensus Statement:

Subjective peripheral nerve stimulation should be "abandoned" because it is "prone to error". Quantitative TOF is recommended.

CUSTOMER INFORMATION

Bell Medical Guarantee!

Minimum 3% savings compared to any competitors catalog pricing.

Phone: 314-772-5600 or 800-875-2355 Monday through Friday, 8:00 AM to 4:45 PM, CST

Email: Email orders to customerservice@bellmedical.com

Fax: 314-772-1233 You may fax your order anytime. Please be sure to include:

- Account number (unless using credit card)
- Billing and shipping address
- Purchase order number, if applicable
- Name, email address and telephone number
- Product number and description
- Unit of measure and quantity ordered

Website: www.BellMedical.com

- Order online. Credit card only at this time.

Prices: Subject to change without notice and do not include shipping and handling.

Terms: Net 10 days from date of invoice.

Minimum: No minimum order. A one time \$6.75 handling charge will be added to all orders.

Payment: Check, AMEX, MasterCard or VISA.

Shipping: All orders are F.O.B. St. Louis, Missouri. All freight charges are prepaid and added to invoice.

Merchandise Returns: All returns must be authorized in advance by Bell Medical, Inc. and be assigned a returned goods authorization number (RGA#) based on the following criteria:

- Merchandise must have been purchased within the last thirty (30) days.
- Merchandise must be in original package and in sellable condition.
- Merchandise returned is subject to a 25% restocking fee unless due to defective product, in which case the merchandise will be replaced, or due to shipping error.
- Merchandise returned due to defect is subject to manufacturer's guidelines.
- There is a minimum restocking charge of \$5.00.

Any credit is subject to final acceptance and inspection of product by Bell Medical, Inc.

The following merchandise is not eligible for return unless proven defective:

- Specially ordered items.
- Used merchandise or products not in original shipping containers.
- Merchandise held over thirty (30) days from shipment.
- Merchandise which has been altered or abused in any way.

Product Warranty: Warranty for products sold will be set by the individual manufacturers of these products. The manufacturer's usual warranty period is one (1) year from date of shipment. The exception to this being rubber, plastic and glass components and materials which are warranted to be free from defects at time of delivery.

Anesthesia Machine and BioMed Service

Bell Medical, Inc. has specialized in anesthesia sales and service since 1975. We are an independent service organization trained by Drager, GE Ohmeda, Penlon, Datascope, and Mindray to service all manufacturers' anesthesia machines. We employ Certified Biomedical Electrical Technicians (CBET's and BMET's) with extensive experience with all anesthesia machines.

We provide comprehensive preventative maintenance for all anesthesia machines regardless of manufacturer. Bell Medical, Inc. uses manufacturer parts for all repairs.

Bell Medical, Inc. offers a comprehensive, fully documented service program, which includes regularly scheduled testing and inspection of the anesthesia machine and related monitors. In addition we provide quarterly Trace Gas Analysis and Room Air Exchange Rate surveys and general biomed service contracts.

Bell Medical, Inc. Service Benefits

Dan Pennington
Service Manager

- Specialist in Anesthesia Machine Service Since 1975
- Service center for Drager, GE, Penlon, Datascope and Mindray
- Over 40 years' Experience Servicing Anesthesia Machines
- Over \$100,000 in Parts Inventory
- Full Products and Completed Service Liability Coverage
- Recondition Anesthesia Machines
- Commitment to Quality Service and Total Customer Satisfaction
- Local Ownership and Commitment to the Community
- One Year Warranty on Parts Replaced
- 90-Day Warranty for All Labor Associated with Repairs

Biomedical Services

Bell Medical offers general biomed services for both surgery centers and clinics as well as on-site full management of biomed service for hospitals. We provide service for specialty devices including sterilizers, scope washers, c-arms, gas monitors, lasers, EKG systems, anesthesia units, ventilators, electrosurgical generators, and much more. We have certified field technicians who can provide on-site repair. We offer superior general biomed services for less than the competition.

To receive a quotation, fax or email a copy of your current contract showing machine models, serial numbers, contract type and expiration date to 314-772-1233 or customerservice@bellmedical.com.

Why Buy New?

Bell Medical, Inc. offers preowned and refurbished Mindray, GE and Drager anesthesia machines. We have machines available for sale with full one year warranty. Bell Medical, Inc. will purchase out dated machines from hospitals and offer trade-in options.

AIRWAYS

Break-away Intubation Airway, Disposable

The Bell Medical Break-away Intubating Airway is an intubation airway designed for use with a flexible endoscope. The Break-away Airway is designed to function as an intubation guide to direct the flexible scope through the vocal cords and as a bite block to protect the fiber optic scope. It fits ET tube sizes up to 9.0mm ID. The disposable airway has the ability to split open to allow the airway to be removed once the endoscope is through the vocal cords and patient is intubated.

- Easy Intubation Guide
- Designed for flexible endoscopes
- Fits up to 9.0mm ET Tubes

B510015	Break-away Intubation Airway, Size 8	\$297.50	50/Box
B510010	Break-away Intubation Airway, Size 8	\$70.00	10/Box
Individually Packaged (IP)			
B510015P	Break-away Intubation Airway, Size 8, IP	\$327.25	50/Box
B510010P	Break-away Intubation Airway, Size 8, IP	\$77.00	10/Box

Ovassapian Intubating Airway, Disposable (5/bag)

Intubating airway designed for use with a fiber optic endoscope. Designed to minimize the risk of disconnection or displacement of the positioned endotracheal tube. Tubular proximal half functions as a bite block. Fits Tube sizes up to 9.0 mm ID. Individually packaged.

B120040	Ovassapian Airway, 5/pk	\$40.95
----------------	--------------------------------	----------------

Bronchoscope Airway, Disposable (10/bag)

The lumen is large enough to guide the scope and ET Tube. The length is designed to form a path leading to the glottis. The device has a breakaway quality for easy removal after intubation. The external biteblock protects the flexible scope.

- Sterile

B120049	Size 0 for up to 4.5mm ET Tube, 36mm Length	\$52.00
B120042	Size 2 for up to 7.0mm ET Tube, 65mm Length	\$52.00
B120044	Size 4 for up to 9.0mm ET Tube, 85mm Length	\$52.00

Williams Airway, Disposable (10/bag)

Use once then discard. The airway intubator is cylindrical on the proximal half and open on the distal half of the lingual surface. The airway intubator is indicated for use as an oral pharyngeal airway, a means of intubating the trachea, and a guide for fiberoptic laryngoscope placement.

B120015	9cm for use with up to 7.5ID endotracheal tube	\$43.25
B120016	10cm for use with up to 8.5ID endotracheal tube	\$43.25

AIRWAYS - CRICOTHYROTOMY

Control-Cric™ Cricothyrotomy System

The Control-Cric System is a simplified surgical approach to a cricothyrotomy that helps to maintain control during a high-stress situation. The Control-Cric has a 10mm long dual sided blade with an integrated sliding trach-hook. The Control-Cric has a pre-shaped stylet that provides airway confirmation with tactile feel of the tracheal rings, along with a 5.5mm ID soft silicone cric-tube with cuff.

- Easy to use!
- 5 Year Shelf Life!
- Cost Effective!
- Saves Lives!

Sliding Tracheal Hook slides over the dual sided blade and into the incision site to help you maintain your airway.

CAPNOGRAPHY

Capnomask™ O2/CO2 Mask with Aromatherapy

The Capnomask™ is ideal for monitored anesthesia cases (MAC) and for use in the PACU. Capnomask™ provides oxygenation while safely monitoring capnography.

- Vanilla scented to help reduce nausea and vomiting
- Capnomask™ is latex free
- Soft transparent DEHP free PVC
- Nose clip and elastic straps for easy adjustment
- O2 line and CO2 monitor line pre-attached for speedy hook-up
- 0.22 micron filter to reduce risk of cross contamination and infection

Capnomask™ Includes: O2 mask, 7' O2 tubing, 10' MxM CO2 sample line with filter

B180155	Adult mask, O2/CO2	\$220.00 50/Box
B180151	Ophthalmic mask, O2/CO2	\$220.00 50/Box
B180152	Pediatric mask, O2/CO2	\$220.00 50/Box

Vanilla scented!

Capnoxigen O2/CO2 Sampling Mask

A consistent means to monitor breathing on non-intubated patients. The CAPNOXYGEN™ mask incorporates a bevel tip sample tube in the mid dome of a medium concentration oxygen mask. Simply connect the male end of the sample line from any sidestream CO2 sample system to the female luer connector on the CAPNOXYGEN™ mask.

B180050	Adult CAPNOXYGEN™	\$110.00/25
B180052	Pediatric CAPNOXYGEN™	\$110.00/25

Adult CAPNOXYGEN™ Mask w/8' Sample Line	B180055	\$134.00/25
Pediatric CAPNOXYGEN™ Mask w/8' Sample Line	B180056	\$134.00/25

CAPNOGRAPHY

POM Procedural Oxygen and Capnography Mask (30/case)

Procedural Oxygen Mask (POM): Procedural Sedation Mask (O₂/CO₂) for upper GI procedures. POM is designed for ERCP, EUS, and EGD procedures.

- Dual oral and nasal entry ports for endoscopes
- Optimizes oxygen concentration during conscious sedation
- Measures capnography reliably even at high oxygen flows
- Allows easy unobstructed access to the patient
- Ideal for Oral or Nasal fiber optic intubations

Adult POM Options:

B180165	POM EZ-Lite w/O ₂ tubing, female luer mask connector	\$225.00
B180167	POM EZ-Lite w/O ₂ tubing, MxM CO ₂ sample line	\$245.00

Disposable "Positive Pressure" Endoscopy Mask

- Fiberoptic Intubation. The ET tube can follow along the bronchoscope orally or nasally through the flexible membrane. After intubation the membrane is pushed inside which allows easy removal of the mask.
- The membrane guarantees an ideal seal and therefore efficient ventilation before, during and after bronchoscopy without time pressure.
- Gastroenterology
- Trans Esophageal Echocardiography

CO₂ ABSORBENT

Amsorb® Plus Carbon Dioxide Absorbent

Amsorb® Plus is a new generation carbon dioxide absorbent, free from strong alkali metal hydroxides with **NO Sodium Hydroxide**, specifically designed for low and minimal flow anesthesia. Amsorb® Plus is the safest absorbent available with these advantages:

- GE Healthcare Endorsed and Validated December 2018
- No Toxic byproducts, No Compound A, No Carbon Monoxide, No Formaldehyde under any conditions
- APSF, Anesthesia Patient Safety Foundation recognized, 2005
- Mannion 2011 ASA Amsorb Plus Study: 25.7% Annual Anesthetic Gas Savings, 59% reduction in product usage, 83% Savings in disposal cost of non-toxic spent absorbent
- No heat or fire hazard, No degradation of anesthetic agents
- PERMANENT COLOR CHANGE, Eliminates weekly need to change absorbent in less waste economically and environmentally
- SUPERIOR PATIENT CARE AND SAFETY WITH AMSORB® Plus

Read the Mannion 2011 ASA Study

ENDOBRONCHIAL TUBES

M

Parker Double Lumen Endobronchial Tube, Left

The Parker "No Clamp needed" Double Lumen Endobronchial Tube for the left side is constructed to help make anesthesia easier and more efficient. The Endobronchial Tube has a Y-connector with a stopcock type valve to quickly and easily cut off and supply air or scope into and out of the tube. The Y- adaptor comes preassembled making it easier than other adaptors that require assembly.

- Pre-assembled Y-connector for expediency
- 90 degree ball-valve eliminate needs for awkward clamps
- Scope and Suction catheter access in either "On" or "off" position
- Easy thread, low friction suction catheters

ENDOBRONCHIAL TUBES

ENDOTRACHEAL TUBE - ET TUBES

Parker Flex-Tip™ Endotracheal Tubes

The patented Parker Flex-Tip Tracheal Tube has a soft, flexible, curved, centered, distal tip that is designed to prevent trauma to the delicate structures of the human airway. This tip, which is flanked by double Murphy eyes, flexes and yields as it is advanced into contact with protruding features of airway anatomy. The centered tip tends to move along the midline of the airway and the glottic opening. The tip's curvature predisposes it to "ski" gently along airway surfaces.

TriAir 4-In-1 Endoscopic Airway Kit

Capnography, Oxygen, BiteBlock and Airway all in one easy to use device.

The TriAir is an all-in one device that will allow the provider to:

- Place the patient's tongue in the proper position for the introduction of the endoscope
- Protect the endoscope from the patient biting down
- Allow for introduction of O₂
- Provide the ability to monitor CO₂

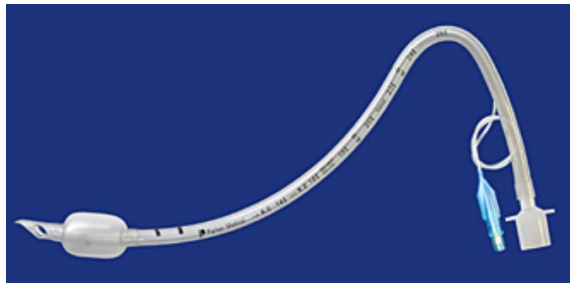

B120041 Endoscopic Airway (Headstrap, 7' O₂ Line, M X M Sample Line) \$160 25/box

Parker Flex-It™ Directional Stylette

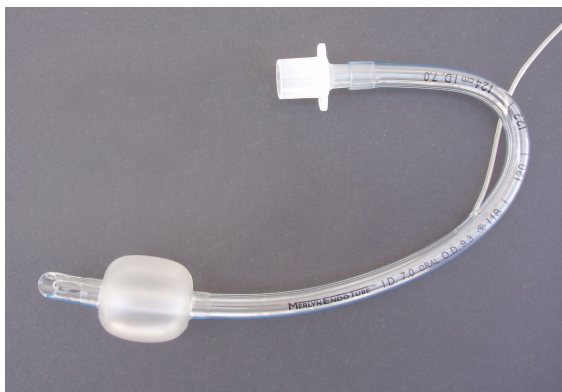

The Parker Flex-It Directional Stylette can be used for oral and nasal intubation and requires no pre-bending. Easy thumb action allows tube curvature to be continuously adjusted during an intubation. Its one-handed operation is designed to facilitate quick, accurate intubation, and it is especially helpful for intubating the most difficult airways.

EYE PROTECTION

EyePro Eyelid Occlusion Dressing - a clean and safe alternative to tape!

EyePro is a sterile dressing specifically designed to maintain eyelid closure during general anaesthesia while maintaining a clear view of the eyes. EyePro uses a “dual zone” adhesive system that maintains eye closure but allows safe and easy removal with minimal eyelid and eyelash trauma. EyePro will seal the eye from external insults while trapping the eye’s moisture.

Call for free samples!

EyePro benefits:

- Packaged Sterile
- Dual zone adhesive protects the eye and eye lashes when applied/removed.
- Reduces skin tears, skin irritation and redness compared to tape.
- Dual non-adhesive tabs allow for easy application and removal, even with gloves
- Each pair of EyePro come packaged together to reduce risk of cross contamination

When using tape, MRSA and/or VRE can be spread to the roll of tape and contaminate the roll for future use. Eye injuries account for 2-3% of all legal claims during anaesthesia. Tape can have damaging effects on the eye and eye lashes when removed from the patient. NoPress eye shield may be used in conjunction with EyePro to assure total patient eye safety.

B100780 EyePro Eye Protection, 100 Each (50 Pair)/Box \$50.00

NoPress Eye Shield - use with EyePro!

The NoPress is a foam and rigid shield to protect patients’ eyes from external pressure. The one-piece shield helps to distribute the pressure evenly around the bony area of the face.

Benefits of this dressing include:

- Low profile to limit snags on drapes or cords
- Transparent shield allows patients eyes to be visible at all times
- Medical grade adhesive keeps mask in place and prevents allergic reactions

NoPress is safer for the patient and easy for the clinician to use. EyePro may be used in conjunction with NoPress eye shield providing total eye safety and control.

Call for free samples!

B100781 NoPress Eye Pressure Shield, 20/Box \$100.00

INFUSION AND IV

SmartStack IV Poles

The SmartStack IV Stand from Bell Medical is what you have been waiting for in an IV Pole! Our specially designed pole base is 100% cast aluminum, providing extra stand support and durability. Its unique design will stack neatly with other bases of its kind, allowing for extra storage space, a more organized facility and easy transportation of multiple stands all at once.

- Unique stacking design with taller outer tube
- Large, smooth rolling casters with 2 wheel locks
- Includes 4 fixed Ram-horn hooks
- Easy, one-handed height adjustment
- Collapsed height of 65"; Extended height of 88"
- 48 month warranty

B130101P	Each	\$305.00
B130114 P	14-Pack	\$4,000.00

PowerMATE®

The PowerMATE® is the only IV pole mountable power tap UL approved for use in patient care areas.

- Hospital Grade
- Cord management
- Safe and convenient access to additional outlets
- Increased equipment mobility with 15 foot power cord
- 1-Year Warranty

LARYNGEAL MASK AIRWAYS

EndoMask Eclipse 100% Silicon Disposable Laryngeal Mask Airway

Eclipse Comfort Seal 100% Silicon LMA

- **Superior silicone cuffs** that conform to the natural contours of the hypopharynx for perfect fit, allowing rapid insertion, excellent seal, and single-hand ventilation. Cuffs are thick and durable with a smooth matte finish.
- **No epiglottic bars** (aperture bars) obstructions enable easy access for a fiberscope and suction catheters.
- **The finest premium-grade silicone** is used in the manufacture of EndoMask® products. Our cuff assembly and tube body is smoother and has less impurities within its structure than other silicone laryngeal masks.
- **Manufacture** of EndoMask is under the strictest quality control and sterile conditions. Our plant operates under certification of ISO and is compliant with FDA and CE standards.
- **All EndoMask products utilize 100 percent latex free** manufacturing and packaging materials.

LARYNGEAL MASK AIRWAYS

BiteMe™ Bite Block

BiteMe is an air-filled, bite block specifically designed to protect patient's teeth and airway devices during general anesthesia.

- Soft FDA approved food grade plastic
- Tapered distal end to allow easy placement between the teeth
- Concave side to allow close conformity when taped against airway device
- Air-filled cavity which creates compliant resistance to teeth clenching on waking up
- Depth markers to allow accurate positioning
- Distal end is blunt to decrease risk of trauma to delicate oral tissues
- Smooth finish makes it easy to insert and remove
- Single use and latex free
- Patented design
- Highly visible in the mouth
- Individually wrapped

Call 800-875-2355 for free sample.

ANESTHESIA MACHINES

M

MINDRAY ANESTHESIA MACHINES

Mindray A Series Anesthesia System

The A3 Anesthesia System combines the familiarity of traditional bellows with digital technology to meet the needs of a wide range of patients in mid-acuity hospitals and ambulatory surgery centers. The intuitive user interface with touchscreen display facilitates changes in ventilation modes and settings. The A3 delivers advanced ventilation with an easy to use and cost effective anesthesia delivery system.

- 15" color touchscreen with digital flow meters and customizable settings
- 6+ modes of ventilation
- Warmed breathing system virtually eliminates internal condensation
- Automatic compliance and fresh gas compensation maintain accurate tidal volumes with a wide range of fresh gas flows and breathing circuits
- Economical single container absorber reduces compressible volume and accepts non-proprietary pre-packaged and loose fill absorbent
- Auxiliary O2 / Air flow meters deliver blended gas to reduce the risk of airway fire
- HL7 connectivity for AIMS and EMR integration
- Available with optional Mindray patient monitor (Passport 12 shown)

**Call 800-875-2355
for quotation!**

3 Year Warranty!

The 15" color touchscreen enables clinicians to easily view and select ventilation settings, so less time is spent maneuvering and more time is devoted to patient care.

Heated absorber eliminates moisture issues plus CO2 absorber can be quickly changed during case and uses non-proprietary pre-pack absorbent.

MRI Machines Available!

PATIENT MONITORS

Edan iM8 Patient Monitor

- ECG, RESP, NIBP, SPO2, 2-Temp, PR, Recorder
- 12.1" High resolution color TFT-LCD Display
- Arrhythmia, S-T Analysis, OxyCRG
- 120 Seconds Full-disclosure Waveforms Review
- 120 Hour Graphic and Tabular Trends Of All Parameters
- Bi-directional Communications with Central Monitoring System
- Pacemaker detection
- Customized alarm setting
- SP10 Accuracy Validated NIBP
- Built-in rechargeable Li-ion battery
- Nurse call, VGA Output
- Suitable for Adult, Pediatric and neonatal patients

iM8: 3/5 Lead ECG, RESP, NIBP, Edan SpO2, RESP, 2-Temp and Recorder	\$ 2,600
iM8: Above configuration with EtCO2	\$ 6,083
iM80: Above with, 4-IBP, EtCO2 and Agent Analysis	\$10,450

2 YEAR WARRANTY

Additional Configurations Available

Edan M3 Vital Signs Monitor

- 5.7 inch Color TFT Screen
- Backlight Control and Standby Mode for Power Saving Display
- Numeric and Waveform Information Simultaneously
- Nurse Call
- PR Measurement (From SpO2/NIBP) Trend table/graph view and record real time waveform printing
- USB data storage and review
- Powerful storage capacity
- Built in Lithium-ion battery for long hours of continuous working.

M3 Standard with SpO2 and NIBP	\$1,335
M3 Standard with SpO2, NIBP and Ear Temperature	\$1,780
M3 Standard with SpO2, NIBP and Covidian Oral Temperature	\$1,950

MONITORS - ETCO2

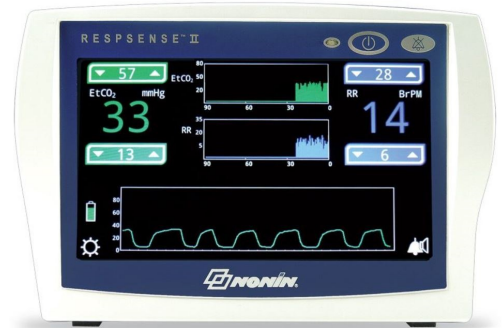

M

Nonin RespSense™ WIDESCREEN ETCO2 Monitor

Touch-panel display monitor offers MedAir™ sidestream EtCO2 technology for a wide range of clinical settings and for both intubated and non-intubated patients. Portable, accurate and cost-effective, perfect for sleep labs and procedural sedation or where fast, easy EtCO2 monitoring is required.

Key Benefits:

- Waveform trend monitoring for endotracheal tube placement verification
- Fast, first breath detection of breathing irregularities
- Extreme portability for continuous monitoring of airway integrity during transport
- Unique moisture management to prevent occlusion
- No calibration or auto zeroing required during patient monitoring for added efficiency
- WIDESCREEN™ touch-panel display
- Numerical EtCO2 and respiratory rate display
- MedAir EtCO2 technology
- 1.5 hours of EtCO2 and respiration rate waveform trending
- Backlit LCD display
- Audible and visual alarms
- Data output via RS-232 port

- B203900 RespSense ETCO2 Only Monitor** \$2,200
- B203901 RespSense II ETCO2 Only Monitor, Color** \$2,900
- B203902 LifeSense II ETCO2 and SPO2 Monitor, Color** \$3,400

Edan MicroCap 9 Capnograph/O2 Monitor

MoveOxy™ Pulse Oximetry Equipped with MoveOxy™ advanced digital SpO2, the MicroCap 9 handheld Capnograph and Oximeter is capable of severe monitoring conditions, providing reliable SpO2 and pulse rate measurements.

- EtCO2/CO2 range: 0 -150mmHg(0-20kPa, or 0-20%(V/V))
- Accuracy: ± 2 mmHg when 0-40mmHg $\pm 5\%$ (reading) when $> 41-70$ mmHg $\pm 8\%$ (reading) when $> 71-100$ mmHg $\pm 10\%$ (reading) when $> 101-150$ mmHg
- Update: Every breath, 10sec, 20sec or 30sec selectable
- Trend length: 24 hours

Specifications:

- Respiration Range: 3-150t/min
- Resp Accuracy: $\pm 1\%$ (reading) or ± 1 times/min whichever is greater
- Flux: 50-250cc/min selectable
- Oximetry saturation range: 0-100%
- SpO2 Accuracy: $\pm 2\%$ when 70-100% $\pm 3\%$ when 50-69%
- Range: 30-250 bpm
- PR Accuracy: ± 2 bpm or $\pm 2\%$ (reading) when 30-250bpm
- Trend length: 24 hours
- Battery type: Built-in rechargeable lithium battery
- Working time: 10 hours

- B203600 MicroCap 9 Capnograph/Oximeter Monitor** \$1,995

MONITORS - ANALGESIA

HFVi Monitor - High Frequency Heartrate Variability Index

The HFVi Monitor provides anesthesia providers with an easy, non-invasive monitoring system which offers an index on the amount of pain medicine needed to properly control pain during surgery and to have the patient arrive in PACU appropriately medicated.

The major benefits for this monitor are to predict postoperative pain, predict hemodynamic reactivity, to help diagnose the ethology of the hemodynamic event, and to titrate opioids to avoid overdosing.

The optimal range for the 4 minute median orange curve is to be between 50 and 70. If the index is greater than 70 the dose of pain medicine can be reduced but if it drops below 50 the patient can have hemodynamic reactivity, due to pain a few minutes later. The yellow number is an instantaneous reading.

- Quantitative window into narcotic dosing
- Enhanced OR turnover saving time
- Patient comfortable yet responsive in PACU

B500010NC	HFVi Consignment Monitor	No Cost*
B500019	HFVi Consignment Sensor	\$320 10/bx

QUANTITATIVE TOF MONITORING

STIMPOD NMS 450X Quantitative Train-of-Four Monitor, Nerve Locator and Stimulator

One-Touch NMT

The STIMPOD NMS450X Nerve Stimulator includes a Tri-axial accelerometer which provides real time feedback of the strength of contraction of the affected limb (Train Of Four, Double Burst and Post Tetanic Count modes only). The strength of each measured contraction is displayed graphically and the relevant ratios are calculated and displayed.

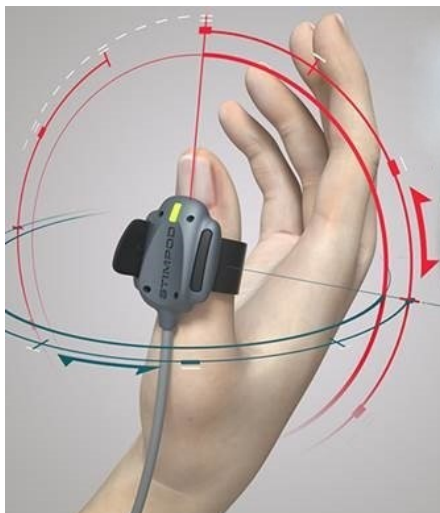

QTOF endorsed by APSF and in IARS consensus statement!

Simple

- One-Touch NMT Monitoring
- Electrode Placement Verification
- Quick Setup & No Calibration
- Handheld
- Data Connectivity

Economical

- Reusable Sensor
- Standard ECG Electrode Compatible
- Quantitative NMT Monitoring reduces incidence of residual paralysis, increases operating room throughput and lowers cost

Proven

- Identifies residual paralysis
- Pioneers of quantitative monitoring technology since 1998
- Trusted by anesthesiologists in over 40 countries

Current Range

Nerve Locating: 0.0 – 5.0mA

Nerve Mapping: 0 – 20mA

NMBA Monitoring: 0 – 80mA

Stimulating Modes

Train-of-Four (TOF)

Double Burst (DB)

Post-Tetanic-Count (PTC)

Tetanus (TET)

Twitch (1Hz, 2Hz, 5Hz)

STIMPOD NMS410 - NERVE LOCATION

Stimpod NMS 410 Nerve Locator for Regional Anesthesia

Combined Nerve Mapping and Nerve Location:

Auto sensing technology provides a solution for simultaneous nerve mapping and nerve location. The Stimpod monitors whether the mapping probe or needle touches the patient and adjusts the current range accordingly, ensuring quick and precise nerve location.

The Stimpod Nerve Mapping Probe was designed to enable transcutaneous nerve mapping at higher currents (to a maximum of 20mA), whilst the tip offers a contact surface small enough to ensure effective discrimination.

Specifications:

Current Range

Nerve Locating: 0.0 – 5.0mA
Nerve Mapping: 0 – 20mA

Load Impedance

Nerve Locating: 0 – 20kΩ (100V)
Nerve Mapping: 0 – 20kΩ (400V)

Stimulating Frequency

(1Hz, 2Hz, 5Hz)

NERVE BLOCK POSITIONING DEVICE

Tereboot Supine Nerve Block Positioning Device

“No more turning patients prone or lateral to perform ultrasound guided sciatic nerve blocks at the popliteal fossa. No more stacking blankets or pillows just to achieve suboptimal, unstable and uncomfortable leg elevation and positioning.”

The Tereboot is a portable and adjustable lower extremity positioning device that you place directly onto your patient's bed for supine positioned ultrasound guided popliteal fossa blocks, adductor canal blocks, saphenous blocks, ankle blocks and nerve stimulation technique popliteal fossa blocks. The disposable padding sleeves are an efficient and cost effective way to turn over the device between patients.

The Tereboot

- No additional space necessary - placed directly on patient's bed
- Height adjustable for patient comfort and to create ample space for the U/S probe in the posterior popliteal fossa
- Adjustable to compensate for leg rotation
- Leg stability for procedure safety and sterility
- Disposable cushion sleeves for convenience and cost effectiveness
- 5-year warranty

Supine Position

- Patient comfort and convenience
- Airway monitoring and intervention with sedation
- Procedure efficiency

Portable

- Weighs only 11 lbs
- Footprint: 11.5"x12"

Sturdy and Durable

- All metal construction - black matte finish

Adjustable

- Height
- Tilt

NERVE STIMULATORS

SunStim Nerve Stimulator and Accessories

New SunStim™ Pro Peripheral Nerve Stimulator

- Easy to read illuminated digital screen functionality
- Ergonomic compact shape fits comfortably in hand
- Optional removable silicone wrap enhances grip, protects device (sold separately)
- Stimulator output current is fully adjustable from 0-70 mA
- Double burst: 2 60-ms bursts of 50 Hz separated by .75 s
- Twitch: 1 pulse per second
- Tetanus: 50 Hz (50 pulses/s) or 100 Hz (100 pulses/s)
- Built-in train of four: 4 pulses in a period of 2 seconds
- Stimulus pulse: square wave monophasic pulses (200 µs duration)
- Side switch to increase/decrease level of stimulation
- Standard battery: 9 volt alkaline
- Nerve stimulator includes battery, ball electrodes, 6' lead with clips (snap version sold separately)

B170104 \$259.95

See page 62 for Quantitative TOF

SunStim™

- Stimulator output current is fully adjustable from 0-70 mA
- Stand-by position: no stimulus pulses are generated
- Twitch: 1 pulse per second
- Tetanus: 100 Hz (100 pulses/s)
- Built-in train of four: 4 pulses in a period of 2 seconds
- Battery indicator light flashes when battery needs to be replaced
- LED (green) battery light indicates that the unit is on, flashes on low battery
- LED (red) flashes with audible indicator sounds each time a stimulus pulse is generated
- Standard battery: 9 volt alkaline
- Nerve stimulator includes battery, ball electrodes, 6' lead with clips (snap version sold separately)

B170103 \$217.45

SunStim Plus™ includes all features of B170103 plus:

- Double burst: 2 60-ms bursts of 50 Hz separated by .75 s
- Tetanus: 50 Hz (50 pulses/s) or 100 Hz (100 pulses/s)

SYRINGE PUMP

OR - INFUSOR ABC Pump 4100

Syringe Infusion Pump for Anesthesia/OR/ICU and NICU

The ABC OR – Infusor is easy to use; allowing users to customize the delivery modes to each patient. The pump comes with fast and easy front syringe and plunger loading. It comes with a cordless power pack that lasts up to 12 hours at 5ml/hr. The warranty is a full one year with free software upgrades. Our new software adds a one button continuous rapid bolus feature!

- Accommodates various syringe manufacturers with automatic size sensing: 1, 3, 5, 10, 20, 30, 60 and 140 ml syringes
- Unique labeling area used to indicate infusion information
- Full alarm capabilities - LED & LCD alerts & audio alarms
- Integrated carrying handle with optional pole mount
- Multiple sensors to monitor delivery accuracy
- Large graphic LCD display for easy viewing
- Simple operation – Easy User customization
Multiple delivery modes (Body-Weight, Mass, Bolus, Continuous, Volume over Time); Adjustable flow rate ranges, changes w/o interrupting flow; Accuracy +/- 3%
- New software offers one button bolus feature that delivers rapid bolus rate of 1,500 mL/hr
- Storage for 90 user defined programmable settings
- Syringe light delineates infusion status from afar
- AC/Battery operated with removable battery pack
- RS232 Interface capabilities

TEMPERATURE

CliniTemp™ Moving Line Temperature Indicators

CliniTemp™ moving line temperature indicators are fast becoming the preferred alternative to esophageal probes, with more units sold than the largest brand of esophageal probes.

CliniTemp™ moving line temperature indicators are non-invasive, easy to use, highly reliable, and provide precise readings that have been well documented over the years.

CliniTemp™ moving line temperature indicators measure surface temperature and give you a core-adjusted reading on a continuous scale on both Centigrade (29° - 41°C) and Fahrenheit (84° - 106°F).

- Accurate to +/- .5°F, 3°C
- Core-adjusted with 3.5°F, 2°C offset

ULTRASOUND

Safersonic Sterile Ultrasound Probe Covers

Fits all major ultrasonic probe heads! Designed for nerve blocks. The ultrasound probe is fully covered by the sterile cover. Sterile procedures can start promptly! After procedure, remove the cover as shown, no residual glue remains! Reduces cleaning time, and improves turnover time for next procedure.

The patented adhesive keeps the cover and the probe head together without bubbles or wrinkles improving image quality.
