Insighters Airway Management System

See page XX

*The Future is
Bright with
Insighters!*

Insighters video display fits Flexible Endoscopes, Rigid Scope and Video Laryngoscope providing a cost effective ONE SYSTEM solution.

Buy the system or order to your needs.

Complete Airway Management System B091990K Includes:

- B091990** Video Laryngoscope, handle
- B091990D** Universal display
- B091998H** Rigid Laryngoscope, handle
- B091999H** Flexible Endoscope, articulating scope
- B091999SH** Flexible Endoscope, articulating scope with channel
- B091999icore** i-Core 2.2mm Flexible Endoscope
- B092900** i-Workstation with wireless module

CUSTOMER INFORMATION

Bell Medical Guarantee!
Minimum 3% savings compared to any competitors catalog pricing.

Phone: 314-772-5600 or 800-875-2355 Monday through Friday, 8:00 AM to 4:45 PM, CST

Email: Email orders to customerservice@bellmedical.com, please be sure to include:

- Account number (unless using credit card)
- Billing and shipping address
- Purchase order number, if applicable
- Name, email address and telephone number
- Product number and description
- Unit of measure and quantity ordered

Website: www.BellMedical.com

- Order online. Credit card only at this time.

Prices: Subject to change without notice and do not include shipping and handling.

Terms: Net 10 days from date of invoice.

Minimum: No minimum order. A one time \$7.35 handling charge will be added to all orders.

Payment: Check, AMEX, MasterCard or VISA.

Shipping: All orders are F.O.B. St. Louis, Missouri. All freight charges are prepaid and added to invoice.

Merchandise Returns: All returns must be authorized in advance by Bell Medical, Inc. and be assigned a returned goods authorization number (RGA#) based on the following criteria:

- Merchandise must have been purchased within the last thirty (30) days.
- Merchandise must be in original package and in sellable condition.
- Merchandise returned is subject to a 25% restocking fee unless due to defective product, in which case the merchandise will be replaced, or due to shipping error.
- Merchandise returned due to defect is subject to manufacturer's guidelines.
- There is a minimum restocking charge of \$20.00.

Any credit is subject to final acceptance and inspection of product by Bell Medical, Inc.

The following merchandise is not eligible for return unless proven defective:

- Specially ordered items.
- Used merchandise or products not in original shipping containers.
- Merchandise held over thirty (30) days from shipment.
- Merchandise which has been altered or abused in any way.

Product Warranty: Warranty for products sold will be set by the individual manufacturers of these products. The manufacturer's usual warranty period is one (1) year from date of shipment. The exception to this being rubber, plastic and glass components and materials which are warranted to be free from defects at time of delivery.

Anesthesia Machine and BioMed Service

Bell Medical, Inc. has specialized in anesthesia sales and service since 1975. We are an independent service organization trained by Drager, GE Ohmeda, Penlon, and Mindray to service all manufacturers' anesthesia machines. We employ Certified Biomedical Electrical Technicians (CBET's and BMET's) with extensive experience with all anesthesia machines.

We provide comprehensive preventative maintenance for all anesthesia machines regardless of manufacturer. Bell Medical, Inc. uses manufacturer parts for all repairs.

Bell Medical, Inc. offers a comprehensive, fully documented service program, which includes regularly scheduled testing and inspection of the anesthesia machine and related monitors. In addition we provide quarterly Trace Gas Analysis and Room Air Exchange Rate surveys and general biomed service contracts.

Bell Medical, Inc. Service Benefits

Dan Pennington
Service Manager

- Specialist in Anesthesia Machine Service Since 1975
- Service center for Drager, GE, Penlon, and Mindray
- Over 50 years' Experience Servicing Anesthesia Machines
- Over \$100,000 in Parts Inventory
- Full Products and Completed Service Liability Coverage
- Recondition Anesthesia Machine Sales
- Commitment to Quality Service and Total Customer Satisfaction
- Local Ownership and Commitment to the Community
- One Year Warranty on Parts Replaced
- 90-Day Warranty for All Labor Associated with Repairs

Biomedical Services

Bell Medical offers general biomed services for both surgery centers and clinics as well as on-site full management of biomed service for hospitals. We provide service for specialty devices including sterilizers, scope washers, c-arms, gas monitors, lasers, EKG systems, anesthesia units, ventilators, electrosurgical generators, and much more. We have certified field technicians who can provide on-site repair. We offer superior general biomed services for less than the competition.

To receive a quotation, email a copy of your current contract showing machine models, serial numbers, contract type and expiration date to customerservice@bellmedical.com.

Why Buy New?

Bell Medical, Inc. offers preowned and refurbished Mindray, GE and Drager anesthesia machines. We have machines available for sale with full one year warranty. Bell Medical, Inc. will purchase used machines from hospitals and offer trade-in options.

Bell Medical and Bay State Anesthesia merged in 2022 to take advantage of synergies. Together we have over 100 years of experience in anesthesia sales and service. We are a specialty distributor that is dedicated to introducing new technologies that enhance the anesthesia provider's ability to deliver safe patient care. We are headquartered in St. Louis, Missouri and have sales representatives throughout the United States.

Bell Medical is committed to delivering high quality products and the best possible customer service. Thank you for considering the products and services in this catalog and on our website. Your business is appreciated.

Sincerely,

Kevin Lueders
President and CEO

AIRWAYS

McMurray Enhanced Airway (MEA), Disposable (10/box)

McMurray Enhanced (oral) Airway is a distal pharyngeal “oral” airway that is easy to use and is a low cost alternative to high flow nasal systems.

- 2021 World EMS Innovation Award Winner
- Easy oral airway placement reduces nose bleed risk of nasal airways
- Enhances ventilation ability on all patients
- Less chin lifts or jaw thrust maneuvers freeing anesthesia hands
- Deliver positive pressure easily with 15mm connector included
- Ideal for upper GI procedures as MEA fits through side of bite blocks
- Built in bite block and large flange for secure placement and protects patient teeth

B010700 McMurray Enhanced Airway (MEA), Adult \$171.50 10/Box

Naso-Flo® Nasopharyngeal Airway with inline Oxygen and EtCO2, (10/box)

- Oxygen port and elbow allow for direct connection to O2 source
- Soft silicone material designed for less traumatic insertions
- Color-coded elbows aid in correct size selection
- Optional filtered respiratory indicator (CO2 monitor connection)
- Delivers oxygen to the pharynx for higher FiO2 delivery to patient

B011000	4.0MM / 18FR, O2 Port, 15mm Connector	\$81.50
B011001	5.0MM / 22FR, O2 Port, 15mm Connector	\$81.50

AIRWAYS

Williams Airway, Disposable (10/bag)

The airway intubator is cylindrical on the proximal half and open on the distal half of the lingual surface. The airway intubator is indicated for use as an oral pharyngeal airway, a means of intubating the trachea, and a guide for fiberoptic laryngoscope placement.

B120015	9cm for use with up to 7.5ID endotracheal tube	\$64.75
B120016	10cm for use with up to 8.5ID endotracheal tube	\$64.75

BiteSafe: Dental Cushion for Berman, Guedel and Williams Airways

BiteSafe is a universal airway dental cushion that helps prevent dental and oral trauma to patients.

BiteSafe will work with your current airways!

- Significantly reduces dental trauma
- Provides a cushioned area for teeth
- Fits all Guedel or Berman oral airways
- Proprietary foam cube with internal cut-out
- Seamless integration into current anesthesiology practices
- Average tooth repair cost is \$2,500
- Single use, latex free, made in USA

Stop risking dental damage with hard oral airways. Choose BiteSafe!

B122000	BiteSafe, Universal Dental Cushion	\$18.00 10/box
B122001	BiteSafe, Universal Dental Cushion	\$84.00 50/box

AIRWAYS - CRICOTHYROTOMY

A

AIRWAYS - CRICOTHYROTOMY

Control-Cric™ Cricothyrotomy System

The Control-Cric System is a simplified surgical approach to a cricothyrotomy that helps to maintain control during a high-stress situation. The Control-Cric has a 10mm long dual sided blade with an integrated sliding trach-hook. The Control-Cric has a pre-shaped stylet that provides airway confirmation with tactile feel of the tracheal rings, along with a 5.5mm ID soft silicone cric-tube with cuff.

- Easy to use!
- 5 Year Shelf Life!
- Cost Effective!
- Saves Lives!

Sliding Tracheal Hook slides over the dual sided blade and into the incision site to help you maintain your airway.

ATOMIZERS

DART, DART-Reach, and EZ Spray

Dart

Dart Reach

EZ Spray

DART provides safe, painless intra-nasal medication delivery.

DART-Reach delivers medications to the upper airway and beyond the vocal cords.

EZ-Spray is a powered atomizer designed for rapid anesthetization of patient's airway. Single patient use, closed system, preventing the possibility of cross-contamination. Connects to oxygen source at 7-10 LPM according to desired flow rate. 180° directional tip provides direct delivery of medication to the upper pharynx.

Why pay more for MAD? Get DART!

CAPNOGRAPHY

Capnomask™ O₂/CO₂ Mask with Aromatherapy, (50/box)

The Capnomask™ is ideal for monitored anesthesia cases (MAC) and for use in the PACU. Capnomask™ provides oxygenation while safely monitoring capnography.

- Vanilla scented to help reduce nausea and vomiting
- Capnomask™ is latex free
- Soft transparent DEHP free PVC
- Nose clip and elastic straps for easy adjustment
- O₂ line and CO₂ monitor line pre-attached for speedy hook-up
- 0.22 micron filter to reduce risk of cross contamination and infection

Capnomask™ Includes: O₂ mask, 7' O₂ tubing, 10' MxM CO₂ sample line with filter

B180155	Adult mask, O₂/CO₂	\$250.40
B180159	Adult mask, Microstream Compatible, O₂/CO₂	\$495.00

CAPNOGRAPHY

CapnoVue® Scope Oxygen and Capnography Mask, 50/case

- GI, Cardiology and Pulmonary prefer CapnoVue SCOPE's direct alignment to mouth.
- Designed for high FiO₂ and easy endoscope access for upper airway procedures
- Measures capnography reliably and accurately even at high oxygen flows
- Bilateral CO₂ sampling ports effective sampling for mouth breathers on upper GI cases
- FDA-cleared for upper airway procedures, Latex and DEHP free

CapnoVue Scope O₂/CO₂ Face Mask with Scope Access:

B180166PS	CapnoVue SCOPE, Pediatric, 13' MSA* SL, 7' O₂ tubing	\$659.00

Upper GI Mask POM Alternative: PrO₂ Mask for ASCs, 30/case

The new PrO₂ Mask is an Upper GI Endoscopy Oxygen Mask that provides scope access and high patient FiO₂ and EtCO₂ monitoring.

- **Oral Access Port:** Allows introduction of endoscopes for Upper GI procedures
- **Nasal Access Port:** Facilitates nasal intubations and bronchoscopy
- **Capnography Port:** Standard luer at the mask with male, female, or MicroStream monitor connections
- **Oxygen Port:** Accepts medium concentration elbow or high concentration reservoir bag

MetroCarts

Anesthesia & Emergency Cart

Crash Cart

- Easy to clean Microban Antimicrobial technology infused in polymer inhibiting growth of microorganisms and the spread of infections.
- Non-metal polymer material eliminates rust or paint chipping that occurs with metal carts
- Light weight and easy to move with built in grip areas for easier control
- Tracking casters enhance steering plus total lock casters help keep cart stable when needed
- Ergonomically designed with users in mind
- Total customization with multiple attachments and accessories available to meet all needs
- Electronic security system options for medication controls
- Metro offers metal, aluminum or polymer carts.

Basix carts can be equipped with electronic touchpads and proximity card readers supporting 500 users.

Starsys carts can be equipped with electronic touchpads and optional proximity card readers with user count up to 3000 and add optional management software, audit trails, and wireless updating capabilities.

Flexline carts have the highest level of security technology. They feature touchpads with LCD screens, motion sensing, and up to 6000 users. Flexline carts can be equipped with up to 3 electronically controlled, double-locking narcotics (or Controlled Substance) drawers for the ultimate in anesthesia medication control and monitoring.

**Bell Medical can configure any cart to fit your needs.
Contact us for more information or a quotation.**

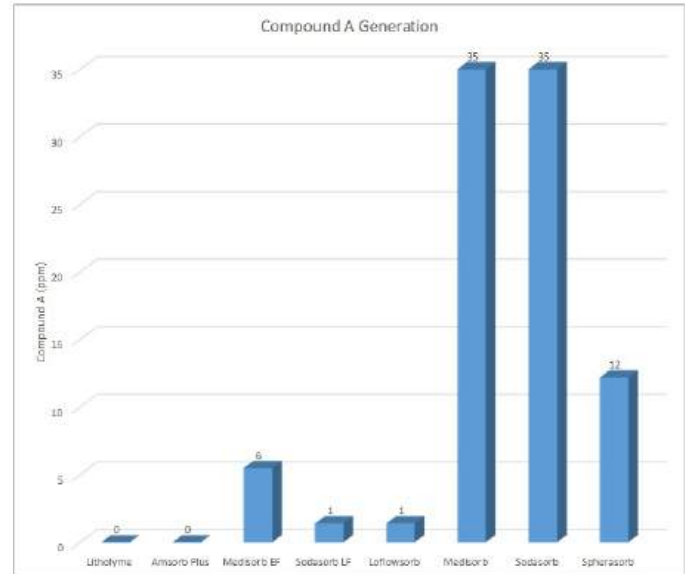

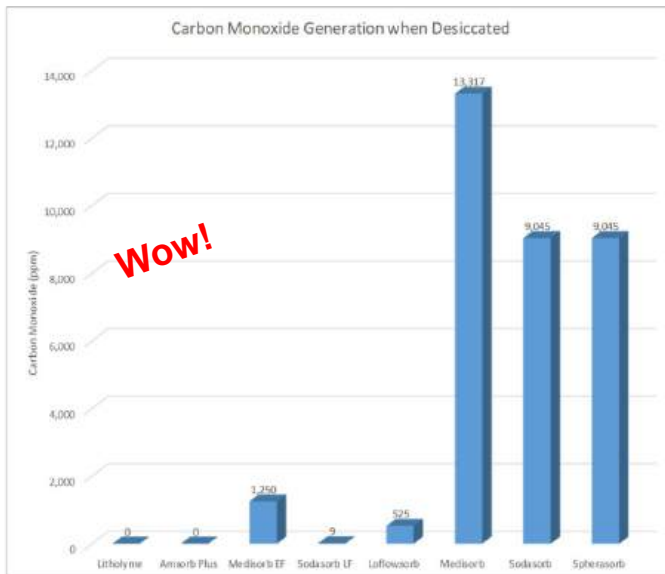

CO₂ ABSORBENT

Amsorb® Plus Carbon Dioxide Absorbent

Amsorb® Plus is a new generation carbon dioxide absorbent, free from strong alkali metal hydroxides with **NO Sodium Hydroxide**, specifically designed for low and minimal flow anesthesia. Amsorb® Plus is the safest absorbent available with these advantages:

- No Toxic byproducts, No Compound A, No Carbon Monoxide, No Formaldehyde
- APSF, Anesthesia Patient Safety Foundation recognized, 2005
- Mannion 2011 ASA Amsorb Plus Study: 25.7% Annual Anesthetic Gas Savings, 59% reduction in product usage, 83% Savings in disposal cost of non-toxic spent absorbent
- No heat or fire hazard, No degradation of anesthetic agents
- PERMANENT COLOR CHANGE
- Safe for disposal in standard waste with low pH

ENDOBONCHIAL TUBES

Parker Double Lumen Endobronchial Tube, Left

The Parker “No Clamp needed” Double Lumen Endobronchial Tube for the left side is constructed to help make anesthesia easier and more efficient. The Endobronchial Tube has a Y-connector with stopcock type valves to quickly and easily open or close each lung to ventilation.

- Pre-assembled Y-connector for expediency
- 90 degree ball-valve eliminate needs for awkward clamps
- Scope and Suction catheter access in either “On” or “off” position
- Easy thread, low friction suction catheters

ENDOTRACHEAL TUBE - ET TUBES

Parker Flex-Tip™ Endotracheal Tubes

The patented Parker Flex-Tip Tracheal Tube has a soft, flexible, curved, centered, distal tip that is designed to prevent trauma. This tip, which is flanked by double Murphy eyes, flexes and yields as it is advanced into contact with airway anatomy. The centered tip tends to move along the midline of the airway and the glottic opening. The tip's curvature predisposes it to "ski" gently along airway surfaces.

BiteMe™ Bite Block

BiteMe is an air-filled, bite block specifically designed to protect patient's teeth and airway devices during general anesthesia.

- Soft FDA approved food grade plastic
- Tapered distal end to allow easy placement between the teeth
- Concave side to allow close conformity when taped against airway
- Air-filled cavity creates compliant resistance to teeth clenching on waking up
- Depth markers to allow accurate positioning
- Distal end is blunt to decrease risk of trauma to delicate oral tissues
- Smooth finish makes it easy to insert and remove
- Single use and latex free
- Highly visible in the mouth
- Individually wrapped

EYE PROTECTION

EyePro Eyelid Occlusion Dressing - a clean and safe alternative to tape!

EyePro is a sterile dressing specifically designed to maintain eyelid closure during general anaesthesia while maintaining a clear view of the eyes. EyePro uses a “dual zone” adhesive system that maintains eye closure but allows safe and easy removal with minimal eyelid and eyelash trauma.

Call for free samples!

EyePro benefits:

- Packaged Sterile, two per package
- Dual zone adhesive with less adhesive on window protects eyes and eye lashes when applied/removed.
- Reduces skin tears, skin irritation and redness compared to tape.
- Dual non-adhesive tabs allow for easy application and removal, even with gloves

B100780 EyePro Eye Protection, 100 Each (50 Pair)/Box \$58.00

NoPress Eye Shield - use with EyePro!

The NoPress is a foam and rigid shield to protect patients' eyes from external pressure. The one-piece shield helps to distribute the pressure evenly around the bony area of the face.

Benefits include:

- Low profile to limit snags on drapes or cords
- Transparent shield allows patients eyes to be visible at all times
- Medical grade adhesive keeps mask in place and prevents allergic reactions

NoPress is safer for the patient and easy for the clinician to use. EyePro may be used in conjunction with NoPress eye shield providing total eye safety and control.

Call for free samples!

B100781 NoPress Eye Pressure Shield, 20/Box \$126.00

Saving Eyes Breakaway Face Protection Shield - use with EyePro!

- Medical-grade transparent plastic makes it easy to monitor patients during procedures
- Breakaway feature allows for rapid removal without disconnecting the breathing circuit
- T opening for use with ETT or LMAs
- Easy to apply with the included strap or a common mask harness
- Intended for adult patients in the supine position
- ANSI Z87 certified for impact protection

B100795 Saving Eyes Face Shield, 10/Box \$310.00

VIDEO AIRWAY MANAGEMENT SYSTEM

Insighters Video Intubation Solution for Total Airway Management

Insight Airway Management System Highlights:

- Video Laryngoscope with HD 3.5" color display portable; Macintosh 3 and 4 standard curve disposable blades, Macintosh 1,2,3,4 strong curved disposable blades
- Six Flexible Endoscopes sizes 2.2, 2.4, 3.6 and 3.5, 4.5, 5.2, and 5.8 with channels
- Rigid Endoscope 3.8mm OD
- iWorkstation, 13" HD color display with cabled and wireless capability
- Wireless connectivity to all airway devices

New from Insight: i-Core and i-Core Airways

- 2.2mm Flexible Endoscope compatible with 3.5" HD color display, wireless module or wired communication to iWorkstation allowing continuous monitoring of airway.
- Airways available; DLT, ET, Endo Blocker, LMA, Closed Suction Catheter.

VIDEO AIRWAY MANAGEMENT SYSTEM

Insighters Video Laryngoscope for Infant to Adult

Insighters video display fits Flexible Endoscopes, Rigid Scope and Video Laryngoscope providing a cost effective ONE SYSTEM solution.

iS-3 and iS-6 Display Features:

- High Definition, 1M Pixels, 3.5" Display
- 270° Rotation and Tilt
- Infant to Adult
- 3 Plus Hour Rechargeable Battery
- Removable Display for easy gas sterilization
- Wifi to iWorkstation
- Photo, Video with Sound Recording. 16GB, 70 hours of video or 80,000 photos
- Anti Fog Technology

iS-6 Additional Features:

- Infant Blade Tip
- 1M Pixel Camera

Optional Rigid Stylets

See Clearly, Do Easily.

LARYNGOSCOPE SAFETY

DentaSafe, Intubation Dental Guard, reduces dental trauma and lawsuits

DentaSafe Advantages:

- Easy to apply and use
- Medical grade elastic cushion
- Hypoallergenic
- Latex free
- Made in USA

**Call 800-875-2355
for free samples!**

"Dental damage is the most common claim made against anesthesia making up 20-30% of claims."

DentaSafe helps prevent costly damage to the upper incisors, which are the most frequently affected teeth during intubation. Single use, disposable foam strip attaches to the flange of the laryngoscope blade and prevents direct contact between the metallic blade and the patient's upper teeth.

B157900 DentaSafe Laryngoscope Tooth Protection (25 pair) \$138.50 50/Box

i-view™ Video Laryngoscope, one size, single use

i-view is the new, single use, fully disposable video laryngoscope.

By incorporating a Macintosh blade, i-view can also be used for direct laryngoscopy. i-view is ready to use in seconds after removing from the packaging. Ergonomic design ensures i-view is easy and instinctive to use, and the integral LCD screen provides a view in a variety of light conditions.

Key advantages:

- Better view of the larynx
- Reduced head and neck manipulation
- Less force required
- Reduced attempts at laryngoscopy
- Higher success rate than direct laryngoscopy

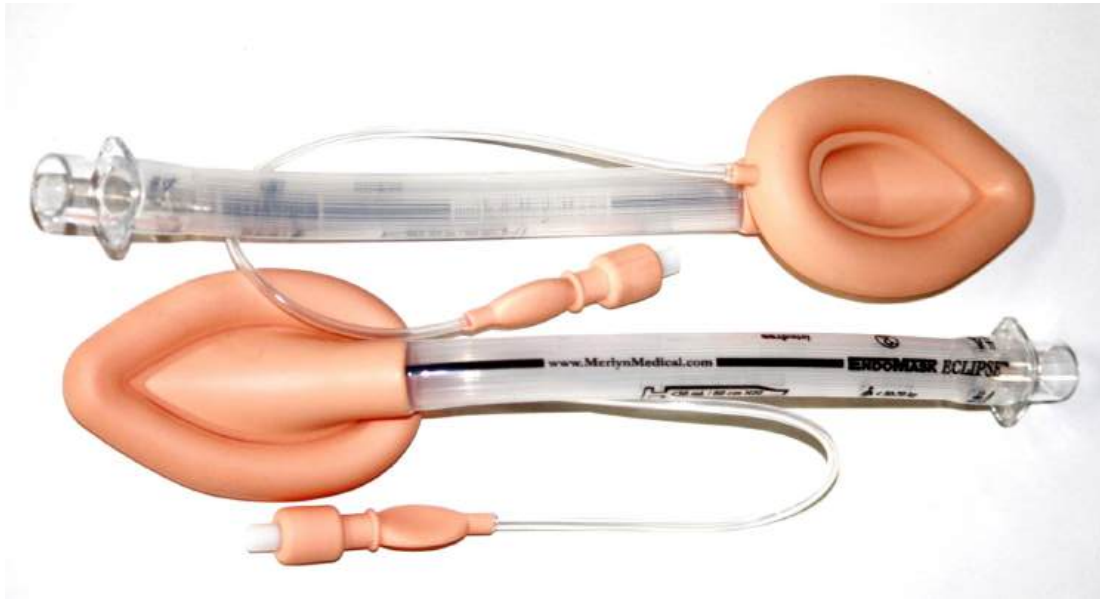

B092800 i-view™ Video Laryngoscope \$248.00 2/Box

LARYNGEAL MASK AIRWAYS

EndoMask Eclipse 100% Silicon Disposable Laryngeal Mask Airway

Eclipse Comfort Seal 100% Silicon LMA

- **Superior silicone cuffs** that conform to the natural contours of the hypopharynx for perfect fit, allowing rapid insertion, excellent seal, and single-hand ventilation. Cuffs are thick and durable with a smooth matte finish.
- **No epiglottic bars** (aperture bars), enable easy access for fiberscope and suction catheters.
- **The finest premium-grade silicone** is used in the manufacture of EndoMask® products. Our cuff assembly and tube body is smoother.
- **Manufacture** of EndoMask is under the strictest quality control and sterile conditions. Our plant operates under certification of ISO and is compliant with FDA and CE standards.
- **All EndoMask products utilize 100 percent latex free** manufacturing and packaging materials.

LARYNGEAL MASK AIRWAYS

i-gel Supraglottic Airway

i-gel is a unique, single use, supraglottic airway management device made from a medical grade thermoplastic elastomer. i-gel has been designed to create a non-inflatable, anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures whilst avoiding compression trauma.

Benefits of the i-gel:

- Unique, soft, gel-like material allows ease of insertion and reduced trauma
- Gastric channel designed to improve and enhance patient safety
- Integral bite-block
- Stability with buccal cavity stabilizer virtually eliminates rotation
- Positive pressure ventilating capabilities
- Intubating Airway, Latex free and PVC free

ANESTHESIA MACHINES

M

MINDRAY ANESTHESIA MACHINES

Mindray A Series Anesthesia System

The A4 Anesthesia System combines the familiarity of traditional bellows with digital technology to meet the needs of a wide range of patients in mid-acuity hospitals and ambulatory surgery centers. The intuitive user interface with touchscreen display facilitates changes in ventilation modes and settings. The A4 delivers advanced ventilation with an easy to use and cost effective anesthesia delivery system.

- 15" color touchscreen with digital flow meters and customizable settings
- 6+ modes of ventilation options
- Warmed breathing system virtually eliminates internal condensation
- Automatic compliance and fresh gas compensation maintain accurate tidal volumes.
- Economical single container absorber reduces compressible volume and accepts non-proprietary pre-packaged and loose fill absorbent
- Auxiliary O2 / Air flow meters deliver blended gas to reduce the risk of airway fire
- HL7 connectivity for AIMS and EMR integration
- Available with optional Mindray patient monitor

**Call 800-875-2355
for quotation!**

3 Year Warranty!

The 15" color touchscreen enables clinicians to easily view and select ventilation settings.

Heated absorber eliminates moisture issues plus CO2 absorber can be quickly changed during case and uses non-proprietary pre-pack absorbent.

PATIENT MONITORS

Mindray ePM Patient Monitors: Easy i-Phone Touch Display

Features

- 10", 12" and 15" multi-gesture, capacitive HD color touchscreen displays, easy user interface
- Waveform capability: ePM 10", 8 waveforms, ePM 12', 10 waveforms
- Integrated parameters: 3 & 5-lead ECG, Masimo SET® SpO2, NIBP, RESP, TEMP
- Optional Nellcor® OxiMax® SpO2 available
- Arrhythmia analysis with atrial fibrillation (Afib) detection standard
- Optional ST and QT/QTc monitoring
- Extensive data storage for trend data, alarms, events, and 48 hours of full disclosure
- Optional Sidestream or Microstream® CO2 module and Multi-gas module (ePM 12M only)
- Wireless monitoring to central station option
- Integrated HL7 and DIAP communication protocol for interface to EMR

PATIENT MONITORS

Edan iM8 Patient Monitor

- ECG, RESP, NIBP, SPO2, 2-Temp, PR, Recorder
- 12.1" High resolution color TFT-LCD Display
- Arrhythmia, S-T Analysis, OxyCRG
- 120 Seconds Full-disclosure Waveforms Review
- 120 Hour Graphic and Tabular Trends
- Bi-directional Communications with Central
- Pacemaker detection
- Customized alarm setting
- SP10 Accuracy Validated NIBP
- Built-in rechargeable Li-ion battery
- Nurse call, VGA Output
- Suitable for Adult, Pediatric and neonatal patients

2 YEAR WARRANTY

Additional Configurations Available

iM8: 3/5 Lead ECG, RESP, NIBP, Edan SpO2, RESP, 2-Temp and Recorder	\$ 2,995
iM8: Above configuration with EtCO2	\$ 4,290
iM80: Above with, 4-IBP, EtCO2 and Agent Analysis	\$ 7,375

Edan MicroCap 9 Capnograph/Oximetry Monitor & Vital Signs Monitor

MINDRAY SURGICAL TABLES

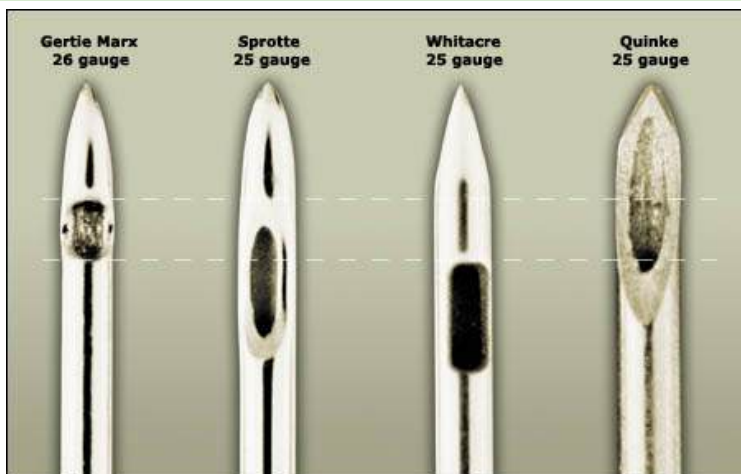

- Easiest table to move with eight wheels on four casters
- Superior table height adjustment from 23" to 43"
- Two-year warranty, leader in industry
- Supports up to 1,000 lbs. static lift and 550 lbs. at full slide
- Slide top ensuring easy access with C-Arm
- Best value at 25% savings
- Bell Medical installation and service support nationwide

Call for information and free onsite demonstration or trial!

NEEDLES: REGIONAL ANESTHESIA

Gertie Marx Regional Anesthesia Needles

- Conical point minimizes PDPH
- Rounded edges with sideport as small and as close to the tip as possible minimizes “failed blocks”
- Thin wall needle
- Crystal clear hub
- Raised sideport indicator

NEEDLES

EchoBlock™ Echogenic Non-Insulated Needles

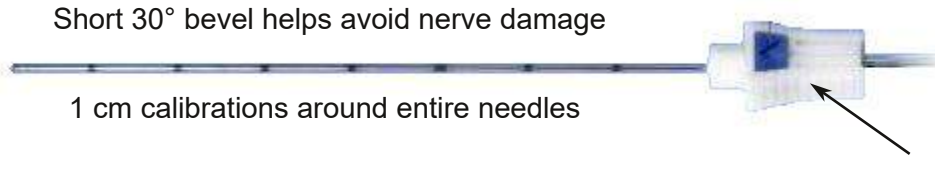

For Ultrasound Guided Regional Anesthesia (for those no longer using nerve stimulators)

- See the target & structures to avoid - for better accuracy and reduced needle sticks
- Faster, more accurate needle placement saves time in the Operating Room

Fixed injection tube cannot be misplaced and will not leak.

Short 30° bevel helps avoid nerve damage

1 cm calibrations around entire needles

BLUE BEVEL INDICATOR
verifies bevel position

B160502	21G x 2" (50mm)	25/box	\$287.50
B160503	21G x 3 1/8" (80mm)	25/box	\$287.50
B160504	21G x 4" (100mm)	25/box	\$320.00
B160506	21G x 6" (150mm)	25/box	\$356.00

Patented Corner Cube Reflectors (CCR™) Provide multi-angled surfaces for maximum reflection even at steep angles.

- See the needle and see the nerve
- Watch the anesthetic encircle the nerve under ultrasound

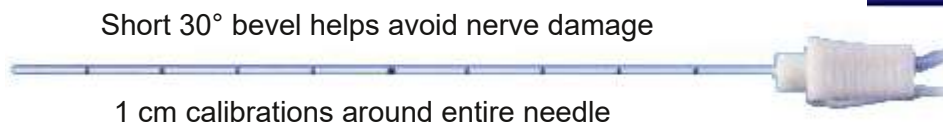

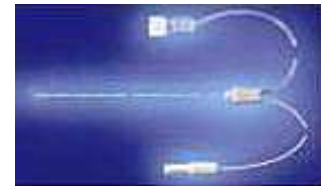

EchoStim™ Echogenic Insulated Needles

For Ultrasound Guided Regional Anesthesia (for those using nerve stimulators in conjunction with ultrasound)

- See the target & structures to avoid - for better accuracy and reduced needle sticks
- Faster, more accurate needle placement saves time in the Operating Room

B16052225	21G x 2" (50mm)	25/box	\$383.00
B16052325	21G x 3 1/8" (80mm)	25/box	\$383.00
B16052425	21G x 4" (100mm)	25/box	\$421.00
B16052625	21G x 6" (150mm)	25/box	\$421.00

Includes injection tube and standard plug that fits most stimulators.

Short 30° bevel helps avoid nerve damage

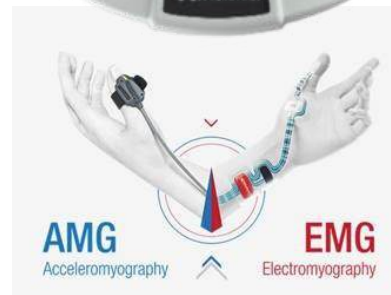

1 cm calibrations around entire needle

QUANTITATIVE TOF MONITORING

STIMPOD 450X+ AMG/EMG QTOF Monitor, Nerve Locator and Stimulator

Quantitative TOF AMG and EMG Monitor and Nerve Locator w/NEW color touch screen display!

The STIMPOD NMS450X+ Nerve Stimulator includes EMG and 3D AMG technology with the simple change of a cable. The new Stimpod 450X+ offers a larger touch screen color display, rechargeable battery, trends, waveform information and easier operation. Quantitative Train-of-Four monitoring is endorsed by APSF and ASA Guidelines recommendation!

Documented QTOF success in recent study:

- Pulmonary complications reduced by 42%
- PACU time reduced by 7%
- Sugammadex dosage decreased by an average of 14%
- 7% increase in patients needing no reversal

Simple

- One-Touch NMT Monitoring
- Electrode Placement Verification
- Quick Setup & No Calibration needed
- Handheld with IV pole option
- Data Connectivity

Economical

- Reusable AMG Sensor or disposable EMG electrode array
- AMG uses standard ECG electrodes saving up to \$176,000/10,000 surgeries
- Quantitative NMT Monitoring reduces incidence of residual paralysis
- QTOF Increases OR and PACU throughput and lowers drug usage

Proven

- Proven to identify residual paralysis, FDA Approved
- Xavant has pioneered quantitative monitoring technology since 1998
- Trusted by anesthesiologists in over 40 countries

New features and capabilities:

Larger color touch screen display, rechargeable battery, trends and waveforms, Auto SMC One-Touch NMT, 40 hour battery & Auto Repeat TOF

Current Range

Nerve Locating: 0.0 – 5.0mA
Nerve Mapping: 0 – 20mA
NMBA Monitoring: 0 – 80mA

Stimulating Modes:

Train-of-Four (TOF)
Double Burst (DB)
Post-Tetanic-Count (PTC)
Tetanus (TET) 50Hz & 100Hz
Twitch (1Hz, 2Hz, 5Hz), DEP

NERVE BLOCK POSITIONING DEVICE

Tereboot Supine Nerve Block Positioning Device

“No more turning patients prone or lateral to perform ultrasound guided sciatic nerve blocks at the popliteal fossa. No more stacking blankets or pillows just to achieve suboptimal, unstable and uncomfortable leg elevation and positioning.”

The Tereboot is a portable and adjustable lower extremity positioning device that you place directly onto your patient's bed for supine positioned ultrasound guided popliteal fossa blocks, adductor canal blocks, saphenous blocks, ankle blocks and nerve stimulation technique popliteal fossa blocks. Reusable pad is made with medical grade vinyl that can be disinfected with standard wipes.

The Tereboot

- No additional space necessary - placed directly on patient's bed
- Height adjustable for patient comfort and to create ample space for the U/S probe in the posterior popliteal fossa
- Adjustable to compensate for leg rotation
- Leg stability for procedure safety and sterility
- Reusable vinyl cushion
- 5-year warranty

Supine Position

- Patient comfort and convenience
- Airway monitoring and intervention with sedation
- Procedure efficiency

Portable

- Weighs only 11 lbs
- Footprint: 11.5"x12"

Sturdy and Durable

- All metal construction - black matte finish

Adjustable

- Height
- Tilt

NERVE STIMULATORS

SunStim Nerve Stimulator and Accessories

New SunStim™ Pro Peripheral Nerve Stimulator

- Easy to read illuminated digital screen functionality
- Ergonomic compact shape fits comfortably in hand
- Optional removable silicone wrap enhances grip, protects device (sold separately)
- Stimulator output current is fully adjustable from 0-70 mA
- Double burst: 2 60-ms bursts of 50 Hz separated by .75 s
- Twitch: 1 pulse per second
- Tetanus: 50 Hz (50 pulses/s) or 100 Hz (100 pulses/s)
- Built-in train of four: 4 pulses in a period of 2 seconds
- Stimulus pulse: square wave monophasic pulses (200 μs duration)
- Side switch to increase/decrease level of stimulation
- Standard battery: 9 volt alkaline
- Nerve stimulator includes battery, ball electrodes, 6' lead with clips (snap version sold separately)

B170104 \$530.00

**See page 67 for
Quantitative TOF**

SunStim™

- Stimulator output current is fully adjustable from 0-70 mA
- Stand-by position: no stimulus pulses are generated
- Twitch: 1 pulse per second
- Tetanus: 100 Hz (100 pulses/s)
- Built-in train of four: 4 pulses in a period of 2 seconds
- Battery indicator light flashes when battery needs to be replaced
- LED (green) battery light indicates that the unit is on, flashes on low battery
- LED (red) flashes with audible indicator sounds each time a stimulus pulse is generated
- Standard battery: 9 volt alkaline
- Nerve stimulator includes battery, ball electrodes, 6' lead with clips (snap version sold separately)

B170103 \$360.00

SunStim Plus™ includes all features of B170103 plus:

- Double burst: 2 60-ms bursts of 50 Hz separated by .75 sec
- Tetanus: 50 Hz (50 pulses/s) or 100 Hz (100 pulses/s)

B170101 \$395.00

POSITIONING PADS

QView: Prone Pillow, Low Cost ProneView Cushion Substitute

QView Prone Pillow Advantages

- Low-cost cushion compatible with current ProneView Helmet System
- Hypoallergenic layer of 3M biocompatible material for patients with sensitive skin
- Clear view access to patient's mouth, nose, eyes with ET tube support and mirror
- Comfortable and supportive of patient's head and neck in contoured pillow cradle
- Single patient use item controls infections and eliminates reprocessing cost
- Lightweight, soft and latex free polyurethane foam with acrylic mirror
- Packaged clean non-sterile, latex free
- Customer review: "QView has no odor whereas Proneview has a fishy smell."

QView Prone Pillow Solutions with 3M hypoallergenic facial coating

B180511	QView, Freestanding w/mirror, LWH: 30.5 X 24.5 X 12cm	\$192 8/case
B180512*	QView-P, used with ProneView Helmet, 30.5 X 24.5 X 12cm*	\$192 8/case

*Exact fit substitute for Mizuho ProneView #D28505CE cushion at guaranteed savings!

PI POSITONING PADS

Pi Bariatric Intubation Positioning Pillow and Ramp

Pi Bariatric Pillow and Ramp aid in mask ventilation, allow for a quality laryngeal view and provide easier intubation while maintaining patient comfort and oxygen saturation.

Figure 3 Patient on OR bed without Pi's Obesity Pillow, the mass of chest is above the plane of upper airway.

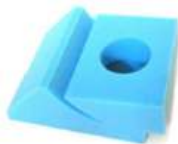

Figure 4 Patient on OR bed with Pi's Obesity Pillow, the mass of chest is moved away from the plane of upper airway.

- Maintains the head and neck in extension for easier first pass intubations.
- Naturally positions airway making the laryngeal inlet easily visible.
- Reduces laryngoscope force needed to lift a patient's head, chin and neck.
- Provides proper airway positioning reducing the chance of damaging airway tissue.
- Aid during post-surgery transport and in PACU to aid in patient breathing & comfort.
- Vacuum packed reducing storage space and shipping cost
- Cost savings with Pi having two products in one with ramp and positioning pillow

PULSE OXIMETRY

Adult Finger Pulse Oximeter

Features:

- Color OLED display
- Audio alarms
- Display SpO2, Pulse Rate, Pulse bar
- Blood perfusion index (PI) as low as 0.2%
- 6 display modes for easy reading from all sides.
- Battery-low indicator
- 2 AAA alkaline batteries
- Accommodates finger sizes from pediatric to adult
- Carrying pouch
- 1 year limited warranty

Child Finger Pulse Oximeter Plus

LED only display.

SYRINGE PUMP

OR - INFUSOR ABC Pump 4100

Syringe Infusion Pump for Anesthesia/OR/ICU and NICU

The ABC OR – Infusor is easy to use; allowing users to customize the delivery modes to each patient. The pump comes with fast and easy front syringe and plunger loading. It comes with a cordless power pack that lasts up to 12 hours at 5ml/hr. The warranty is a full one year with free software upgrades. Our new software adds a one button continuous rapid bolus feature!

- Accommodates various syringe manufacturers with automatic size sensing: 1, 3, 5, 10, 20, 30, 60 and 140 ml syringes
- Unique labeling area used to indicate infusion information
- Full alarm capabilities - LED & LCD alerts & audio alarms
- Integrated carrying handle with optional pole mount
- Multiple sensors to monitor delivery accuracy
- Large graphic LCD display for easy viewing
- Simple operation – Easy User customization
Multiple delivery modes (Body-Weight, Mass, Bolus, Continuous, Volume over Time); Adjustable flow rate ranges, changes w/o interrupting flow; Accuracy +/- 3%
- New software offers one button bolus feature that delivers rapid bolus rate of 1,500 mL/hr
- Storage for 90 user defined programmable settings
- Syringe light delineates infusion status from afar
- AC/Battery operated with removable battery pack
- RS232 Interface capabilities

B400230	Syringe Pump	\$3,645
B400231	Rotational Pole Clamp	\$165
B400232	Clone Cable	\$170

One year warranty with free software upgrades!

TEMPERATURE

CliniTemp™ Moving Line Temperature Indicators

CliniTemp™ moving line temperature indicators are non-invasive, easy to use, highly reliable, and provide precise readings that have been well documented over the years.

CliniTemp™ moving line temperature indicators measure surface temperature and give you a core-adjusted reading on a continuous scale on both Centigrade (29° - 41°C) and Fahrenheit (84° - 106°F).

- Accurate to +/- .5°F, 3°C
- Core-adjusted with 3.5°F, 2°C offset

READY HEAT TEMPERATURE BLANKETS

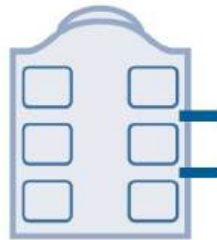

B324001

B324000

**Warmth without
forced air**

B324002

- Mobile patient warming that moves with the patient from pre-op, intra-op and post-op.
- Warms up automatically, no electricity needed, 38-40c in 10-15 minutes up to 10 hours.
- Cost effective way to prevent hypothermia, increasing patient comfort and an effective solution for infection control and reduced surgical site infections.
- Medical grade non-woven material, engineered thermal pads and proprietary high frequency welding constitute this fully-disposable patient warming solution.
- With a complete line of blankets, Ready-Heat can be used in the operating room, for patient rescue, transport and throughout the hospital for treating shock, trauma and hypothermia.
- Ready-Heat blankets have been US military medical protocol since 2006, as well as the choice of the US Air Force for patient transport.
- Five year shelf life and compact storage.

Patient Warming Blankets:

B324000	Adult Full Body, 34"x60"	\$256	10/box

First Responder Warming Blankets:

B324003	Adult, 34"x48"	\$228	8/box
B324004	Adult Half Body, 34"x44"	\$236	12/box

Proudly made in the USA!

ULTRASOUND

Safersonic Sterile Ultrasound Probe Covers

Fits all major ultrasonic probe heads! Designed for nerve blocks. The ultrasound probe is fully covered by the sterile cover. Sterile procedures can start promptly! After procedure, remove the cover as shown, no residual glue remains! Reduces cleaning time, and improves turnover time for next procedure.

The patented adhesive keeps the cover and the probe head together without bubbles or wrinkles improving image quality.
